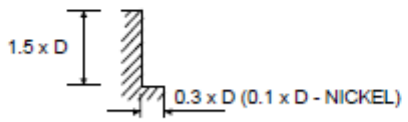
				f (mm/min)	173	136	133	181	148	131	122

SIDE CUTTING



Recommended cutting depths are **maximum** depths, and speeds and feeds are a starting point based on these depths.
All recommendations are based on ideal machining conditions. Adjustments may need to be made according to your set-up.
Finishing cuts typically require reduced feed rates and/or higher spindle speed, with a_e of 2% x D; please adjust parameters accordingly.

v_c - cutting speed (m/min)
n - RPM (rev/min)
f_z - feed per tooth (mm)
f - feed rate (mm/min)
a_p - axial depth of cut
a_e - radial depth of cut
