

SURE GRIP LIKE NEVER BEFORE

NITRILE GLOVES WITH A REVOLUTIONARY, DISTINCT DIAMOND STRUCTURE

MERCATORMEDICAL

ideall® GRIP+

Protective specialty gloves made of nitrile, with thicker walls and diamond texture, provide excellent grip and protection at work in greasy and wet environments.

Available in two colours – orange and black.

Recommended for

All construction and assembly works, including in the automotive, construction, industrial, mechanical, food-related, cleaning and DIY sectors. Suitable for electricians, plumbers, maintenance technicians, metal-working and woodworking plant employees, employees of municipal services and of technical, operational and sanitary sections.

Resistance to lubricants and oils

health and safety at work in a dry, wet and greasy environment.

Diamond texture

anti-slip structure which ensures unparalleled grip even in difficult conditions.

Suitable for contact with food

limited transmission of dirt from the employee's hands to food, as well as from food to the employee's hands.

Original inside

the glove has the diamond texture inside as well, which provides additional space for air and prevents hand sweating when using it.

2.5x

Thicker than standard available gloves

which ensures a high level of resistance to damage.

Silicone-free

excellent for work at spray-painting plants.
